Subject: Dangers of fluoridation - cancer

Hello,

This letter is to urgently request the removal of all added fluoridation to our country's water supplies, as we must stop the possibility of inducing cancer with unwarranted use of this toxic chemical.

There is scientific evidence of cancer related to osteosarcoma : New York - April 29, 2009 -- Blood fluoride levels were significantly higher in patients with osteosarcoma than in control groups, according to research published in Biological Trace Element Research (April 2009). Osteosarcoma, a rare bone cancer, occurs mostly in children and young adults.

Some Additional References:

1) Biological Trace Element Research, "Serum Fluoride and Sialic Acid Levels in Osteosarcoma," by Sandhu R, Lal H, Kundu ZS, Kharb S, Apr 24, 2009 [Epub ahead of print]

2) Cancer Causes Control "Age-specific fluoride exposure in drinking water and osteosarcoma (United States), by Bassin et al., May 2006

3) New Jersey Department of Health, "A Brief Report On The Association Of Drinking Water Fluoridation And The Incidence of Osteosarcoma Among Young Males," Cohn PD. (1992).

The evidence again Fluoridation is mounting, and substantial. You have received much of it already.

PLEASE, do the RIGHT thing, and PROTECT THE CITIZENS OF THIS NATION.

Thank you,

Jane Riskin
