To Public Comments:

Prop 65: Aspartame is a carcinogen. It has poisoned many people! Vote to label & ban ASPARTAME

To Georgia Legislative Delegation

ASPARTAME violates the Delaney Amendment and the substance is very harmful to many that consume it knowingly & unknowingly. There should be WARNING labels on all foods & drinks & drugs to protect the public from this dangerous carcinogen additive.

I have been affected by it & I have friends that also have had damaging affects from this Aspartame. It is in many drinks, food and medicine! Get it out! **Ban this poison immediately!** The studies that are paraded around as authentic that say this artificial sweetener is safe is a lie. You must go to reliable studies to see the true results, found on many websites including Dr. Betty Martini's www.mpwhi.org .

Our population has been inundated with this poison. It causes among other debilitating conditions and diseases, Birth Defects, Fertility problems, Cancer, Brain Damage and Nerve Damage in different presentations because it is an excitotoxin. Go to www.mpwhi.org for more details. You will find studies and results from many sources.

California is the first state to put this on the ballot. This is a big step. Congratulations to taking the health of your citizens seriously. Also, from New Mexico, State Senators, Ortiz and Pina support this legislation. I hope more states follow their lead. This is a national problem. It needs to be dealt with in each state. I just wish that State Senators & the House in Georgia were as proactive as well as the national Senators & Congressman. There needs to be Warning labels as the first step then it needs to be banned as it is in several other countries. If other countries around the world see the danger then why can't the USA and the FDA?

It is a sad thing that greedy people follow the money rather than follow healthy common sense. Atlanta is the home to Coke. A huge buyer and consumer of aspartame for their products. Searle has profited greatly from this industry with Donald Rumsfeld's help in forcing the FDA to approve it for consumption after the FDA had originally said NO to it's SAFETY. It is our turn to say NO to this HARMFUL DRUG.

The public must be educated and become aware. In force, the public has the ability to stop the sale just by refusing to purchase these tainted items and show solidarity by demanding labeling to go on all edible products. There are healthy substitutes to replace aspartame and all other harmful artificial sweeteners. "Just Like

Sugar" is a healthy product that can be used in baking and as an additive to foods made from orange peel and chicory that is all natural.

My hope is that Prop 65 will be important enough to the people of California that they will vote for labeling and banning of this dangerous drug.

Good Health to you!
